interior

Intro

Living Colour is the unique paint that shifts in colour hue with changes in ambient temperature, creating warm and cool colours. Available in Covered in Paint AQenamel Satin or Low Sheen Acrylic, offering the level of serviceability corresponding to these finishes.

Due to the nature of the ingredients that create the colour changing effect, certain precautions must be taken. Living Colour is light sensitive and should be shielded from **any direct sunlight** and therefore it is an interior product only.

Preparation and Application

Follow the required surface preparation in accordance with standard paint preparation practices. Apply 1 coat of **Covered in Paint Acrylic Primer Undercoat**. Some deeper tones of **Living Colour**, require a tinted base coat. Apply 2 coats of **Living Colour** by brush or roller. Some deeper tones of **Living Colour**, may also require a third coat. Spread rate is 12-14 m² depending on surface porosity and texture. Typical drying time touch dry in 30 minutes, recoat in 4 hours. Full hardness is reached in 7 days. Clean up in water.

Colours

Living colour is available in a standard and a select range of custom colours.

Packaging

Living Colour is available in 1litre and 4litre quantities.
